

Join our team:

# Front-End Engineer

Our mission: **a digital framework for innovation, so simple and playful, that everyone can be a DaVinci, Picasso or Elon Musk.**

We are hiring the brightest individuals who share our passion.

Our startup is based in Berlin where we design and engineer **the first web based framework for innovation.** We hire full-time software developers, designers and data-scientists.

## You will:

- build ideations and explorations tools, like a digital whiteboard for realtime collaboration or a news feed for innovative projects.
- work with the *product* and *UX-Designers* from Alpha to Beta and beyond.
- build playful interfaces from UI wireframes and scratch.
- implement tested, scalable service-oriented software.
- advise through regular code reviews and tech talks.

## Strong candidates have these skills:

- Bachelor Degree in Computer Science or equivalent
- **Javascript**, ES6+, JSON, HTML, CSS, React, Babel, git
- Realtime Web Applications (Node, Socket)
- You're a curious mind, team player and not afraid to get in and start tinkering to make things better.
- **Impressive Portfolio / GitHub**
- Based in Berlin (remote work considered)

## Exceed our expectations with these experiences:

- You have led projects end-to-end and built web systems at scale
- Graph/ NoSQL Databases
- WebGL, Canvas, AWS, Electron.js
- Data Visualisation

## What we offer

- Healthy startup life 🍷 opportunities for growth, salary and equity 🦄
- Purpose and big impact! Space for experiments, upskilling and mind bending ideas.
